

FOOD ALLERGEN WARNING

Food allergens are present in the dishes we create from scratch in our kitchen and serve here in our restaurant every day. We have highlighted 14 allergens that could be present in our dishes, but as the contents of freshly prepared foods can vary, this is for guidance purposes only. The symbols below have been added to the majority of the shelf edge labels for our deli menu items (excluding specials) to highlight the allergens contained within each dish. We have also identified items suitable for vegetarians to aid your choices. Please check with our Executive Chef should you have a severe food intolerance or allergy so we can help you make the right choices.
