

Welcome to Accelerated Maths

Year 7 is the most important time for all the students who start in a new school and with new teachers. At the Bulmershe School we not only provide students with essential Number and Algebra skills, but we also equip them with the importance of working independently right from the beginning of their academic year. This has been achieved very successfully through our use of the Accelerated Maths programme. Also, at the start of each year 7 and year 8 lesson, students spend 5-10 minutes which is designed to fill gaps in students' basic mental calculation strategies and also to empower them with the numeracy skills and fluency required to fully access GCSE Maths concepts when they move to Key Stage 4 study.

The Accelerated Maths programme gives students a further 30 minutes of practising key mathematical skills per week. Accelerated Maths provides deep Maths practice at the unique levels students need in order for them to grow; from foundational skills to grade-level standards. This programme has been very successful in enabling students build incremental confidence in mastering Maths.
